

CORCENTRIC INVOICE MANAGEMENT

Make invoicing *faster, more accurate, fully compliant, and automated*

*Accounts Payable teams too often have to grapple with invoice and payment processes that are paper-intensive, manual, and error-prone, negatively impacting their reputation in the company and the relationship with their suppliers. Too much time is spent handling errors, exceptions, and supplier interactions instead of the higher-level functions for which they were hired. When Accounts Payable is being asked to do more with less resources, these inefficiencies are a burden.*

## Corcentric Invoice Management

Corcentric's cloud platform-based Invoice Management solution creates the perfect alignment of procurement and accounts payable (A/P) with broader business outcomes and metrics. The Corcentric solution focuses on the following two key areas to help you build control and efficiency:

## Invoicing Management

### Pinpoint accuracy and improve spend control

- Supplier invoice entering
- No-touch invoice process flow based on automated processing and workflow
- Invoice automatic matching
- Invoice manual matching
- Internal re-invoicing
- Scan and convert paper-based invoices

## AP entries, taxes and payment management

### Real-time efficiency

- Accounts Payable entries management
- Taxes management including VAT compliance
- Payment management

Making invoicing faster, more accurate, fully compliant, and automated to better control spend is critical for transformative Procurement – and empowering business decisions. Corcentric Invoice Management creates perfect alignment of Procurement and Accounts Payable (A/P) with broader business outcomes and metrics. Our solution helps improve productivity by eliminating redundant data, accelerating the invoice-to-payment cycle, and resolving matching errors and exceptions.

*Accounts payable professionals surveyed by IOFM spend 84 percent of their time bogged down by a seemingly endless list of manual transaction processes.*

## Benefits:

- Improve collaboration with the supplier to speed up onboarding and error resolution
- Reduce operational costs and increase efficiency by speeding up processing and the validation of invoices
- Eliminate paper processes and manual errors
- Simplify invoice matching and management
- Better identification of matching mode details – how the supplier invoice has been matched and how the invoice has been created
- Enhanced payment control and Accounts Payable responsiveness thanks to simple and quick access to invoices

*In 2020, exceptions (62%) remain the bane of AP's existence slowing processing and creating bottlenecks that mute efficiency and effectiveness.*
