

TRAILER PREMIUM

Our most advanced trailer-management solution for commercial fleets.

Supply chain issues—along with **rising fuel and maintenance costs**—are key challenges for fleet managers. One way to simplify these pain points is to **optimize trailer productivity**.

Introducing **Trailer Premium** from **MICHELIN Connected Fleet**. With **TPMS** and **GPS tracking combined**, this advanced trailer-management solution helps fleets **anticipate and control costs**, including those related to **detention and trailer maintenance**.

Trailer Premium offers fleets the ability to **track the location and performance of their trailers in real-time**. Plus, you'll have the power to **monitor tire pressures and temperatures** so you can identify and correct tire issues before they cause an incident on the road.

Plus, when you **partner with MICHELIN Connected Fleet**, your decision is backed by our heritage of **over 130 years of expertise in the mobility industry**.

KEY BENEFITS

Trailer Premium gives fleet managers and operators the right tools to...

Avoid emergency roadside service incidents.

Help prevent emergency roadside service events, and the costs of tire repair, driver downtime, late deliveries and potential accident liability, with tire temperature and pressure monitoring alerts (TPMS).

Get real-time visibility of your trailers' locations.

Know exactly where and how your trailers are being used to keep track of detention and simplify billing, plus increase on-time deliveries and productivity.

Understand and optimize your fleet's trailer utilization.

Get up-to-date trailer utilization reports and other actionable insights with customizable reports and consultations with our Customer Success team.

THE MICHELIN CONNECTED FLEET DIFFERENCE

MICHELIN Connected Fleet services and solutions are designed to provide the tools and information fleet operators and managers need to easily manage their fleets on a daily basis and transform their operational efficiency.

More than a supplier, we work as a true partner and provide you with recommendations, based on your mobility data, so that you can reduce your costs, improve your productivity, ensure the safety of your drivers and manage sustainable fleets.
