

INTELLIGENT APPLICATIONS

# Intelligent Applications Overview

*In today's results-driven environment, we realize that innovation is paramount for you to achieve accelerated and sustainable business growth. The demand for agility, improved user experience, and ease of accessing data are top of mind for you.*

Corcentric's Intelligent Applications alleviate these concerns by automating tedious tasks and digitally transforming the way you manage your finance processes. Built on an AI-powered platform, these solutions reduce workload and empower faster, more informed business decisions. You are enabled to track expenses and spending, while also recognizing cost savings and leveraging increased cash flow.

## Available Solutions

### Intelligent AP Automation:

Gives AP departments increased AP processing speed, efficiency, and productivity with intelligent data capture to maximize accuracy and decrease costs. Through artificial intelligence and machine learning, Intelligent AP Automation minimizes the effort and work required, reducing AP processing time from days to minutes.

- **Document Management:** Identify, split, and rename documents, in near real-time, across a fully automated process.
- **Process Optimization:** Increasing speed and visibility at every stage, AI accurately identifies discrepancies and anomalies, and automatically codes invoices—with minimal human intervention.
- **Improved Processing:** Reduce processing time through detailed line-item extraction, two- and three-way matching, and double verification.

### Gopher Intelligent Assistant:

Leverage AI to simplify your complex business processes and empower your teams to make more

informed decisions from anywhere. Gopher Intelligent Assistant makes it possible to collaborate seamlessly across the organization through Microsoft Teams. It delivers access to key information with the ability to take action instantly—from your mobile phone.

- **Natural Language Processing:** Save time and reduce training needs by interacting with Gopher in plain statements and questions.
- **Flexibility:** Access data and keep workflows moving while mobile through conversational interactions on Microsoft Teams—without ever logging into the platform.
- **Adaptability:** Custom knowledge base configured to your company's most asked prompts and data retrieval needs.

Using Gopher Intelligent Applications, customers can easily access reports, gain visibility into their full workflow process, and receive prompts to review or approve requests.

### Flexibility and Adaptability Delivered

As an industry-leading solutions provider, Corcentric regularly introduces enhancements to support you!

Artificial intelligence (AI) and machine learning (ML) are highly woven into our Intelligent Applications solutions. These features help expand the way you manage your business processes, and increase the opportunities for collaboration, in Microsoft Teams.

Learn more about Corcentric's innovation initiatives and comprehensive solution suites, and how you can benefit from Intelligent Applications.
